

# Expand Your Career in Vermont!

Omega Optical is well-known for its willingness to take on some of the greatest light manipulation challenges confronting the photonics industry. Last fall, Omega Optical celebrated its 50th Anniversary. Proud of its past, Omega now stands at the dawn of a brand-new future.

A future that will leverage its current brand as a problem solver but expand into higher growth emerging markets, armed with key new personnel, with key new capabilities, and new capital partners.

Joining Omega at this time is a rare opportunity, to get in on the ground floor of emerging technology enterprise that has a 50-year pedigree. If you are interested in talking about becoming part of this new future, then we would very much like to talk to you.
